PART TWO - READING COMPREHENSION (25 marks)

Read the following passage carefully and do the exercises that follow.

SOLAR-POWERED PLANE MAKES HISTORY

A solar-powered plane has made history by flying from Japan to Hawaii, a journey of almost 6,500 kilometres. The plane is called Solar Impulse 2. Solar panels that cover the plane convert the sun's rays into power. Scientists hope that all airplanes in the future will fly using solar power. Solar Impulse 2 landed in Hawaii after a 118-hour flight across the Pacific Ocean. Swiss pilot Andre Borschberg tweeted about his feelings after arriving in Hawaii. He wrote: "Just landed in Hawaii with Solar Impulse...It's a dream coming true." The flight broke the record for the longest journey made by a solo pilot in an unfuelled plane. The previous record was 76 hours, set by American pilot Steve Fossett in 2006.

Solar Impulse 2 is attempting to fly around the world using only solar power. It set off from Abu Dhabi in March and stopped in Oman, India, Myanmar and China. Its next stop will be Arizona in the USA. From there it will fly to New York, before heading to Europe and then

back to Abu Dhabi. One of the aims of the journey is to raise awareness about climate change and renewable energy. Solar Impulse 2 co-pilot Bertrand Piccard told the USA Today newspaper that: "The most important thing isn't to make world records. It's to show what we can do with clean technologies." This is important for our planet because airplanes produce around 12 per cent of the CO2 from all sources of transportation.

Exercise One (5X2=10 marks)

Choose the correct answer according to the passage.

1. How far was the flight from Japan to Hawaii?
 - A. exactly 6,500km
 - B. nearly 6,500km
 - C. more than 6,500km
 - D. just over 6,500km

2. The final destination of Solar Impulse 2 will be _____.
 - A. Abu Dhabi
 - B. China
 - C. Arizona
 - D. Europe

3. Where does the pilot come from?
 - A. Switzerland
 - B. Sweden
 - C. Swaziland
 - D. Suriname

4. What kind of energy does Solar Impulse 2 want to raise awareness of?
 - A. renewable
 - B. nuclear
 - C. kinetic
 - D. magnetic

5. What kind of technology does the project want to raise awareness of?
 - A. computer
 - B. information
 - C. modern
 - D. clean

Exercise Two (5X2=10 marks)

Read the passage and choose whether the following statements are true (T) or false (F).

- | | |
|--|-----|
| 1. Scientists say that all planes will be solar-powered by 2020. | T/F |

| 3. <u>set off</u> | c. create |
| 4. <u>show</u> | d. transform |
| 5. <u>produce</u> | e. demonstrate |

SECTION THREE

TRANSLATION (20 marks)

Translate the following passage into Greek.

Every day, we live in a world full of electromagnetic radiation produced by electrical appliances, wiring in buildings, and other technologies that are part of modern life. From the dishwasher and the microwave oven in the kitchen, to the radio next to your bed and the mobile phone you hold to your ear – sometimes for hours each day – exposure to electromagnetic radiation is growing and becoming a serious health threat. The possible threats to human health include brain tumours, leukaemia and cancer.
