PART I: READING COMPREHENSION (50 MARKS)

Read the following passage carefully and answer the questions that follow:

I remember the night Hafiz and I left for London we were both very nervous. Imagine, at 17, being away from home for three whole weeks!

The 13-hour flight from Malaysia to London was uneventful and we landed at Heathrow airport at 6 p.m. On the bus to Russell Square we caught our first glimpse of London. It was beautiful and very different from anything I had seen before. We later checked into a University residential hall, where Hafiz and I stayed with other students from all over the world.

The opening ceremony of the seminar was a very grand event. All 300 students gathered at the Main Hall. Just imagine: 300 students from all over the world in London for a science seminar.

For the next two weeks we had the chance to study the role of science in industry and the scientific research in the 20th century. There were lectures from about 30 scientists from over 10 countries.

One of the things I learnt in London was independence – we had to find our way to the lectures, there were no rules and no one to tell us what to do.

The best demonstrations were on chemistry. They were presented in a laboratory with brightly coloured liquids and often a bang and smoke!

There were many trips to other towns. We spent whole days in Cambridge and Oxford, two of the best university towns in the world. In contrast with the crowds and the noise of London, these towns are very quiet, with large fields and old trees. There are rivers flowing through them, old stone bridges and large buildings ... a perfect environment to learn.
